SOURCE INFORMATION

This map displays land ownership information as it was determined by the Montana Natural Heritage Program on or about March 15, 2010. The data used to generate this map were acquired from a variety of state and federal agencies. Most of the public lands information was originally digitized by the Bureau of Land Management (BLM) from 1:100,000 scale BLM Public Lands Data Base. Additional information was compiled using the Montana Natural Heritage Program's State Geologic Map. This map was produced by the Montana Natural Heritage Program and was last updated as of the date indicated at the bottom of this page.

The symbol used for the data is a 1:100,000,000 scale data symbol derived from a 1:25,000 scale base map of Montana.
