SOURCES/ACKNOWLEDGEMENTS

The private land data were developed for the Montana Cadastral Database Project. This data is provided through a cooperative effort between the Montana Department of Administration (DPA), the Montana Department of Forestry (DOR), the Montana Department of Fish, Wildlife & Parks (MFWP), and the Montana Department of Transportation (MDT). The DPA provides the land ownership data, the DOR provides the boundary data, the MFWP provides the land ownership data, and the MDT provides the road data.

The public land data on the MT Natural Heritage Program land ownership data collection. Much of the data was originally digitized by the Bureau of Land Management (BLM) and the Montana Department of Forestry (DOR). Additional information, corrections and updates (especially for BLM lands) were provided by the BLM and the DOR. The DOR maintains the GIS database layer and the DOR maintains the private ownership information.

The base data for the public ownership data is 1:100,000, though many of the individual parcels are digitized from 1:25,000 maps or survey data. Private ownership data is accurate to scales of 1:25,000 or better.

Map produced September 2008 with ownership data current as of August 2008.
